**Course Structure for B.A. (Hons.) Economics**

**B.A. (Hons.) Semester I (under CBCS)**

ECO-C1	Economics Core Course 1: Introductory Microeconomics
ECO-C2	Economics Core Course 2: Mathematical Methods for Economics-I
ECO-AECC1	Ability Enhancement Compulsory Course (AECC) –I (Environment Studies)

General Elective ( GE) Course-I & II : any two of the following Papers from ( GE1 ,GE2) List)

SOC-GE02	Fundamental of Sociology ( GE2 list)
STAT-GE-1	Statistical Methods( GE 1 list)
MAT-C2	Algebra (Open)

**B.A. (Hons.) Semester II (under CBCS)**

ECO-C3	Economics Core Course 3: Introductory Macroeconomics
ECO-C4	Economics Core Course 4: Mathematical Methods for Economics-II
ECO-AECC2	Ability Enhancement Compulsory Course (AECC) –II ( English communication)

General Elective ( GE) Course-III & IV : any two of the following Papers from ( GE3 ,GE4) List)

SOC-GE04	Social Stratification ( GE 4 list)
STAT-GE-2	Introductory Probability ( GE3 list)
MAT-C4	Differential Equations ( Open)

**B.A. (Hons.) Semester III (under CBCS)**

ECO-C5	Economics Core Course 5: Intermediate Microeconomics-I
ECO- C6	Economics Core Course 6: Intermediate Macroeconomics-I
ECO- C7	Economics Core Course 7: Statistical Methods for Economics
ECO-SEE1	Skill Enhancement Course 1: Data Sources-I

General Elective ( GE) Course-V : any one of the following Papers

SOC-GE05	Indian Society: Images and Realities
STAT-GE-3	Basics of Statistical Inference
MAT-C1	Calculus

**B.A. (Hons.) Semester IV (under CBCS)**

ECO-C8	Economics Core Course 8: Intermediate Microeconomics – II
ECO-C9	Economics Core Course 9: Intermediate Macroeconomics– II
ECO-C10	Economics Core Course 10: Introductory Econometrics
ECO-SEE2	Skill Enhancement Course 2 : Data Sources-II

General Elective ( GE) Course-VI : any one of the following Papers

SOC-GE06	Rethinking Development
STAT-GE-4	Applied Statistics
MAT-C3	Real Analysis

**B.A. (Hons.) Semester V (under CBCS)**

ECO-C11	Economics Core Course 11 : Indian Economy-I
ECO-C12	Economics Core Course 12 : Development Economics-I
ECO-DSE1	Discipline Specific Elective (DSE) Course-I :Economics of Public Finance
ECO-DSE2	Discipline Specific Elective (DSE) Course-II :International Economics

**B.A. (Hons.) Semester VI (under CBCS)**

ECO-C13	Economics Core Course 13 : Indian Economy-II
ECO-C14	Economics Core Course 14 : Development Economics-II
ECO-DSE3	Discipline Specific Elective (DSE) Course-III :History of Economic Thought
ECO-DSE4	Discipline Specific Elective (DSE) Course-IV :Economics of Industry

C: Core Courses; GE: Generic Elective; AECC: Ability Enhancement Compulsory Course

GE subjects are to be selected by the students from the pool of GE Subjects offered by the various Departments of the University.

**Generic Elective Subjects (Offered by Economics Department) for Non-Economics Students**

1. ECO-GE2: Introductory Microeconomics
2. ECO-GE4: Introductory Macroeconomics
3. ECO-GE5: Indian Economy-I
4. ECO-GE6: Indian Economy-II

**NOTE:** The Department is also generic electives in Sociology only for the students of the Economics as it may not be feasible for all the students of Economics Honors to study Sciences and no other department in humanities is offering any generic elective courses. So following Generic electives subjects in Sociology are also being offered:

1. SOC-GE02: Fundamentals of Sociology
2. SOC-GE04: Social Stratification
3. SOC-GE05: Indian Society: Images and Realities
4. SOC-GE06: Rethinking Development
5. ECO-SEE1: Data Sources-I
6. ECO-SEE2 : Data Sources -II

**Department of Economics, Panjab University, Chandigarh**

**Course Structure for B.A. (Hons.) Economics**

**Syllabi of B.A. (Hons.) Semester I (under CBCS)**

**ECO-C1: INTRODUCTORY MICROECONOMICS**

**Max. Marks: 80**

**Time: 3 Hrs.  
Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

## Course Description

This course is designed to expose the students to the basic principles of microeconomic theory. The emphasis will be on thinking like an economist and the course will illustrate how microeconomic concepts can be applied to analyze real-life situations.

### Instructions for Paper-setter and candidates:

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be **9** questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks ( $10 \times 2 = 20$ ).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks ( $15 \times 4 = 60$ )

### UNIT- I

Exploring the subject matter of Economics. Why study economics? Scope and method of economics; the economic problem: scarcity and choice; the question of what to produce, how to produce and how to distribute output

Cardinal Utility Analysis .

Ordinal Utility Analysis: The consumption decision - budget constraint, consumption and income/price changes, demand for all other goods and price changes; description of preferences (representing preferences with indifference curves); properties of indifference curves; consumers optimum choice; income and substitution effects.

### UNIT- II

Theory of production: laws governing short run and long run. Producers equilibrium and expansion path

Cost Theory: Short run and long run cost curves.

The Firm and Industry under Perfect Market Structure: Price and output determination ; short run and long run.

### UNIT- III

Determinants of individual demand/supply; demand/supply schedule and demand/supply curve; market versus individual demand/supply; shifts in the demand/supply curve, demand and supply together; how prices allocate resources. The basic competitive model. Supply and Demand How Markets Work, Markets and Welfare Markets and competition

Elasticity of demand: its measurements, applications and determinants.

Consumer surplus; producer surplus and the efficiency of the markets.

Concept of dead weight loss ; Govt intervention in the form of Taxes and Subsidies.

#### **UNIT- IV**

Single seller monopoly: Price and output determination

Input Markets Labour and land markets - basic concepts (derived demand, productivity of an input, marginal productivity of labour, marginal revenue product); demand for labour; input demand curves; shifts in input demand curves; competitive labour markets and firms profit maximisation conditions in input market ; and labour markets and public policy. Derivation of labour supply and savings decision - choice between leisure and consumption.

5. Salvatore.D. (2007). *Micro economic theory and Applications*( 4<sup>th</sup> ed.) Oxford University Press.

## **ECO-C2: MATHEMATICAL METHODS FOR ECONOMICS-I**

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

### **Course Description**

This is the first of a compulsory two-course sequence. The objective of this sequence is to transmit the body of basic mathematics that enables the study of economic theory at the undergraduate level, specifically the courses on microeconomic theory, macroeconomic theory, statistics and econometrics set out in this syllabus. In this course, particular economic models are not the ends, but the means for illustrating the method of applying mathematical techniques to economic theory in general. The level of sophistication at which the material is to be taught is indicated by the contents of the prescribed textbook.

### **Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be **9** questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks ( $10 \times 2 = 20$ ).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks ( $15 \times 4 = 60$ ).

### **UNIT- I**

**Preliminaries and Functions of one real variable:** Logic and proof techniques; sets and set operations; relations; functions and their properties; number systems. Graphs; elementary types of functions: quadratic, polynomial, power, exponential, logarithmic; sequences and series: convergence, algebraic properties and applications; continuous functions: characterizations, properties with respect to various operations and applications.

### **UNIT- II**

**Differentiable Functions and Single-variable optimization:** Differentiable functions: characterizations, properties with respect to various operations and applications; second and higher order derivatives: properties and applications. Geometric properties of functions: convex functions, their characterizations and applications; local and global optima: geometric characterizations, characterizations using calculus and applications.

### **UNIT- III**

**Integration of functions:** Methods of Substitution and partial fractions and simple economic

applications

#### UNIT- IV

**Difference equations:** Introduction, solution of difference equations upto 2<sup>nd</sup> order, simple economic applications.

**Readings:**

K. Sydsaeter and P. Hammond, (2002). *Mathematics for Economic Analysis*, Pearson Educational Asia: Delhi.

**Generic Elective for Economics Honours Students only**

**GENERAL ELECTIVE (GE) COURSE-I & II**

**SOC-GE02: FUNDAMENTALS OF SOCIOLOGY**

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

**Course Description**

The systematic study of human behaviour and human society is a relatively recent development. The central emphasis of the paper would be to develop a conceptual clarity regarding the basic sociological terms and themes, thus leading to a development of a sociological terms and themes, thus leading to a development of a sociological outwork. The course would also discuss the works of founding father which led to the development to sociological thinking.

**Instructions for Paper-setter and candidates:**

1. The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

2. There shall be **9** questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks (10 x 2= 20).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks (15x4=60).

**UNIT – I**

**Developing Sociological Outlook:** Definition and Scope; Significance and Uses of Sociology; Relationship of Sociology with other Social Sciences – Anthropology, Economics, Political Science, Psychology, Philosophy and History.

**UNIT – II**

**Basic Concepts: Society** – Meaning and Characteristics, Theories of Origin, Individual and Society. Community, Association and Institution – Meaning, Characteristics and Differences. Groups – Definition, Characteristics and Classification.

**UNIT – III**

**Culture and Socialization:** Culture-Definition, Cultural Lag, Acculturation, Assimilation, Pluralism. Culture and Personality.

**Civilization:** Definition, Traditional and Modern. Socialization – Meaning, Stages, Agencies.

**UNIT – IV**

Development of Sociological Thinking. Comte: Law of Three Stages. Marx: Materialistic Conception of History. Max Weber: Social Action and Rationality. Emile Durkheim: Social Facts and Social Solidarity.

## **STAT-GE-1: STATISTICAL METHODS**

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

**Course Description**

This is a course on statistical methods for economics. It begins with some basic concepts and terminology that are fundamental to statistical analysis and inference. It then develops the notion of probability, followed by probability distributions of discrete and continuous random variables and of joint distributions. This is followed by a discussion on sampling techniques used to collect survey data. The course introduces the notion of sampling distributions that act as a bridge between probability theory and statistical inference. The semester concludes with some topics in statistical inference that include point and interval estimation.

**Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be **9** questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks (10 x 2= 20).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks (15x4=60)

## **UNIT- I**

Introduction: Definition and scope of Statistics, concepts of statistical population and sample. Scales of measurement - nominal, ordinal, interval and ratio. Variables and attributes, Diagrammatical Representation of Data, Summarization of Data: Frequency Distribution and Graphical Presentation.

## **UNIT- II**

Measures of Central Tendency: mathematical and positional. Measures of Dispersion: range, quartile deviation, mean deviation, standard deviation, coefficient of variation, moments, measures of skewness and kurtosis

## **UNIT- III**

Bivariate data: Definition, scatter diagram, simple correlation, rank correlation.

Trivariate Data: Partial and Multiple Correlation Coefficients

Fitting of Simple linear and quadratic regression lines using principle of least squares

## **UNIT- IV**

Theory of attributes and consistency of data, independence and association of attributes, measures of association and contingency for  $2 \times 2$  and  $r \times s$  contingency tables.

## **SUGGESTED READINGS:**

## **MAT-C2: ALGEBRA**

**Max. Marks: 80**

**Time : 3 Hrs.**

**Credits:6**

**(5 Class Room Teaching + 1 Tutorial)**

**Note :**

- 1.The question paper will have nine questions. Question No.1 spread over the whole syllabus will be compulsory. Candidates will attempt five questions.**
- 2.There will be two questions from each unit and the students will be required to answer one question from each unit.**
- 3.All questions carry equal marks.**

**Objective :** The concepts and techniques from linear algebra are of fundamental importance in many scientific disciplines. The main objective is to introduce basic notions in linear algebra that are often used in mathematics and other sciences. The emphasis will be to combine the abstract concepts with examples in order to intensify the understanding of the subject.

### **UNIT I (15 hrs)**

Review of system of linear equations, general theory of system of linear equations, n-dimensional vector space, linear dependence, rank of a matrix, system of homogenous and non- homogeneous linear equations, an axiomatic construction of theory of determinants.

(Scope as in chapters 1, 2, 3 of [1] )

### **UNIT II (15 hrs)**

A deeper look at Complex Numbers, taking roots of complex numbers, quick review of operations on polynomials, divisors and greatest common divisor, roots of polynomials, fundamental theorem, corollaries of fundamental theorem, rational fractions.

(Scope as in chapters 4 and 5 of [1] )

### **UNIT III (15 hrs)**

Evaluating roots of polynomials of third and fourth degree, bounds of roots, sturm's theorem, other theorems on the number of real roots, approximation of roots. (Scope as in chapter 9 of [1] )

#### UNIT IV (15 hrs)

Definition of a linear space, an isomorphism, finite dimensional spaces, bases, linear transformation linear subspaces, characteristic roots and eigen values, (Scope as in chapter 2 of [6])

## **Syllabi of B.A. (Hons.) Semester II (under CBCS)**

### **ECO-C3: INTRODUCTORY MACROECONOMICS**

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

**Course Objective:** This is the first module in a three-module sequence that introduces students to the basic concepts of Macroeconomics. Macroeconomics deals with the aggregate economy. This course discusses the preliminary concepts associated with the determination and measurement of aggregate macroeconomic variables like GDP, savings, investment, money, inflation and the balance of payments. It also introduces students to simple analytical frameworks (e.g., the IS-LM model) for determination of equilibrium output.

#### **Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be 9 questions in all.

The first question would be compulsory, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidates will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks ( $10 \times 2 = 20$ ).

Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidate shall be required to attempt one question from each unit-4 in all. Each question shall carry 15 marks ( $15 \times 4 = 60$ ).

#### **Unit-I**

##### **Introduction to Macroeconomics and National Income Accounting**

Basic issues studied in macroeconomics: Measurement of gross domestic product; income, expenditure and the circular flow; real versus nominal GDP; price indices; national income accounting for an open economy; balance of payments: current and capital accounts

#### **Unit-II**

##### **Money**

Functions of money; quantity theory of money; determination of money supply and demand; credit creation; tools of monetary policy

#### **Unit-III**

##### **Inflation**

Inflation and its social costs; hyperinflation

## Unit-IV

### The closed Economy in the Short Run

Classical and Keynesian systems: simple Keynesian model of income determination; IS-LM model; fiscal and monetary multipliers

**The labour market:** Wage determination; wages, prices and employment; natural rate of unemployment.

## ECO- C4: MATHEMATICAL METHODS FOR ECONOMICS -II

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

### Course Description

This is the first of a compulsory two-course sequence. The objective of this sequence is to transmit the body of basic mathematics that enables the study of economic theory at the undergraduate level, specifically the courses on microeconomic theory, macroeconomic theory, statistics and econometrics set out in this syllabus. In this course, particular economic models are not the ends, but the means for illustrating the method of applying mathematical techniques to economic theory in general. The level of sophistication at which the material is to be taught is indicated by the contents of the prescribed textbook.

### Instructions for Paper-setter and candidates:

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be 9 questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks ( $10 \times 2 = 20$ ).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks ( $15 \times 4 = 60$ ).

### UNIT- I

**Differential Equation:** Introduction; Solution: Variable Separable Case, Homogeneous Case, Standard Linear Differential Equation, Bernoulli's form, Exact Equation; Solution of Linear differential Equation with Constant Coefficients; Simple Application Questions.

### UNIT- II

**Linear algebra:** Vector spaces: algebraic and geometric properties, scalar products, norms, orthogonality;

linear transformations: properties, matrix representations and elementary operations; systems of linear equations: properties of their solution sets; determinants: characterization, properties and economic applications.

### UNIT- III

**Functions of several real variables:** Geometric representations: graphs and level curves; differentiable functions: characterizations, properties with respect to various operations and applications; second order derivatives: properties and applications; the implicit function theorem, and application to comparative statics problems; homogeneous and homothetic functions: characterizations and economic applications.

### UNIT- IV

**Multi-variable optimization:** Convex sets; geometric properties of functions: convex functions, their characterizations, properties and applications; further geometric properties of functions: quasi convex functions, their characterizations, properties and applications; unconstrained optimization: geometric characterizations, characterizations using calculus and applications; constrained optimization with equality constraints: geometric characterizations, lagrange characterization using calculus and applications; properties of value function: envelope theorem and economic applications.

**Generic Elective for Economics Honours Students only**

**GENERAL ELECTIVE (GE) COURSE-III & IV**

**SOC-GE04: SOCIAL STRATIFICATION**

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

**Course Description**

The systematic study of human behaviour and human society is a relatively recent development. The central emphasis of the paper would be to develop a conceptual clarity regarding the basic sociological terms and themes, thus leading to a development of a sociological terms and themes, thus leading to a development of a sociological outwork. The course would also discuss the works of founding father which led to the development to sociological thinking.

**Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be **9** questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks (10 x 2= 20).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks (15x4=60).

**UNIT – I**

***Social Stratification:*** Concept - Social Stratification, Inequalities and Differentiation. Elements: Position, Role and Status. Perspectives on Stratification – Functionalist: Davis and Moore, Tumin; Conflict – Marx, Dahrendorf; Multi dimensional Weberian.

**UNIT II**

***Forms of Stratification and Social Mobility:*** Forms of Stratification – Caste, Class, Race and Gender. Social Mobility: Definition; Indicators – Social, Economic, Political; Types – Horizontal and Vertical (Upward and Downward) and Intergenerational.

**UNIT – III**

***Social Change:*** Social Change – Definition. Factors: Demographic, Technological, Educational, Legislative. Processes of Change: Sanskritization, Westernization, Modernization and Globalization.

**UNIT – IV**

***Social Change in India:*** Change in Caste Structure; Rise of Middle and Neo-Middle Class; Changing Status of Women; Resurgence of Ethnicity.

***Essential Readings:***

## **STAT-GE-2 :INTRODUCTORY PROBABILITY**

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

### **Course Description**

This is a course on statistical methods for economics. It begins with some basic concepts and terminology that are fundamental to statistical analysis and inference. It then develops the notion of probability, followed by probability distributions of discrete and continuous random variables and of joint distributions. This is followed by a discussion on sampling techniques used to collect survey data. The course introduces the notion of sampling distributions that act as a bridge between probability theory and statistical inference. The semester concludes with some topics in statistical inference that include point and interval estimation.

### **Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be 9 questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The

candidates are required to attempt 10 questions. Each question shall be of **two** marks ( $10 \times 2 = 20$ ).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks ( $15 \times 4 = 60$ )

#### **UNIT- I**

Probability: Introduction, random experiments, sample space, events and algebra of events. Definitions of Probability – classical, statistical, and axiomatic. Conditional Probability, laws of addition and multiplication, independent events, theorem of total probability, Bayes' theorem and its applications.

#### **UNIT- II**

Random Variables: Discrete and continuous random variables, p.m.f., p.d.f. ,c.d.f. Illustrations of random variables and their properties. Expectation, variance, moments and moment generating function.

#### **UNIT- III**

Standard probability distributions: Binomial, Poisson, geometric, negative binomial, hyper geometric, uniform, normal, exponential, beta, gamma and their applications. Fitting of Binomial, Poisson and Normal Distributions

#### **UNIT- IV**

Chebyshev's inequality ,Convergence in probability, Weak law of large numbers, Convergence in Distribution, De-Moivre Laplace and Lindeberg-Levy Central Limit Theorems (C.L.T.).

#### **SUGGESTED READINGS:**

1. Hogg, R.V., Tanis, E.A. and Rao J.M. (2009): Probability and Statistical Inference, Seventh Ed, Pearson Education, New Delhi.
2. Miller, Irwin and Miller, Marylees (2006): John E. Freund's Mathematical Statistics with Applications, (7th Edn.), Pearson Education, Asia.
3. Meyer, P.L. (1970): Introductory Probability and Statistical Applications, Oxford & IBH Publishing, New Delhi.

## **MAT-C4: Differential Equations**

### **THEORY**

**[Max. Marks: 100]**

**(Final-80+Internal Assessment-20)**

**Time: 3hrs.**

**Credits: 4**

**Note:**

- 1. The question paper will have nine questions. Question No.1 spread over the whole syllabus will be compulsory. Candidates will attempt five questions.**
- 2. There will be two questions from each unit and the students will be required to answer one question from each unit.**
- 3. All questions carry equal marks.**

**Objective:** *To exhibit the techniques for obtaining solutions to ordinary differential equations and the basic ideas and theory behind those techniques.*

#### **UNIT I (10 hrs)**

Classification of Differential Equations: Their Origin and applications. Nature and method of solutions. Initial and boundary value problem. Existence and uniqueness theorem. (Scope as in Chapter 1 of Ref. [3]).

Exact differential equations and integrating factors, separable equations and equations reducible to this form, linear equation and Bernoulli equations, special integrating factors and transformations. Clairaut equation. (Scope as in Chapter 2 of Ref. [3])

#### **UNIT II (10 hrs)**

Applications of First Order Equations: Orthogonal and oblique trajectories. (Scope as in Chapter 3 of Ref. [3]), Higher-Order Linear Differential Equations: Basic Existence Theorem, The Homogeneous Equation, Wronskian, its properties and applications.

Reduction of order, then on-homogeneous equation, the homogeneous linear equation with constant coefficients, initial-value problem, the Cauchy-Euler equation, theorems on the second-order homogeneous linear equation. (Scope as in Chapter 4 of Ref. [3])

### **UNIT III (10 hrs)**

The method of undetermined coefficients, method of variation of parameters, basic properties of the Laplace transform, the inverse Laplace transform, Solving IVP's with Laplace transforms.

### **UNIT IV (10 hrs)**

Ordinary points and singular points, power series solution about an ordinary point, power series solution about singular points, The method of Frobenius.

(Scope as in Chapter 6 of Ref. [3]).

## **MAT-C4 Differential Equations**

### **PRACTICAL**

**[Max. Marks: 50](Final-40+Internal Assessment-10)**

**Time : 3hrs.**

**Credits: 2**

#### **List of Practicals (using any software)**

1. Plotting and finding solution of first order differential equation.
2. Plotting and finding solution of second order differential equation.
3. Plotting and finding solution of third order differential equation.
4. Solution of initial value problems
5. Solution of boundary value problem.
6. Exponential growth model.
7. Exponential decay model.
8. Limited growth of population
9. Orthogonal and Oblique Trajectories
10. Solution of ODE by Reduction of order.
11. Power series solution and matching with exact solution.

## **GENERIC ELECTIVE FOR NON-ECONOMICS HONOURS STUDENTS**

### **ECO-GE4: INTRODUCTORY MACROECONOMICS**

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

**Course Objective:** This is the first module in a three-module sequence that introduces students to the basic concepts of Macroeconomics. Macroeconomics deals with the aggregate economy. This course discusses the preliminary concepts associated with the determination and measurement of aggregate macroeconomic variables like GDP, savings, investment, money, inflation, and the balance of payments. It also introduces students to simple analytical frameworks (e.g., the IS-LM model) for determination of equilibrium output.

#### **Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be **9** questions in all.

The first question would be compulsory, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidates will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks (10 x 2= 20).

Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidate shall be required to attempt one question from each unit-4 in all. Each question shall carry 15 marks (15 x 4= 60)

#### **Unit-I**

**Introduction to macroeconomics and national income accounting** Basic issues studied in macroeconomics: Measurement of gross domestic product; income, expenditure and the circular flow; real versus nominal GDP; price indices; national income accounting for an open economy; balance of payments: current and capital accounts.

#### **Unit-II**

**Money** Functions of money; quantity theory of money; determination of money supply and demand; credit creation; tools of monetary policy.

#### **Unit-III**

**Inflation** Types; Social Costs; Hyperinflation.

## **Unit-IV**

### **The closed economy in the short run**

Classical and Keynesian systems; simple Keynesian model of income determination; IS-LM model; fiscal and monetary multipliers.

#### **Readings:**

1. Abel, A., Bernanke, B. (2016). Macroeconomics, 9<sup>th</sup> ed. Pearson Education.
2. Blanchard, O. (2018). Macroeconomics, 7<sup>th</sup> ed. Pearson Education.
3. Dornbusch, R., Fischer, S., Startz, R. (2018). Macroeconomics, 12<sup>th</sup> ed. McGraw-Hill.
4. Jones, C. (2016). Macroeconomics, 4<sup>th</sup> ed. W. W. Norton.
5. Mankiw, N. (2016). Macroeconomics, 9<sup>th</sup> ed. worth Publishers.

**B.A. (Hons.) Semester III (under CBCS)**

**ECO-C5: INTERMEDIATE MICROECONOMICS – I**

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

**Course Description**

The course is designed to provide a sound training in microeconomic theory to formally analyze the behaviour of individual agents. Since students are already familiar with the quantitative techniques in the previous semesters, mathematical tools are used to facilitate understanding of the basic concepts. This course looks at the behaviour of the consumer and the producer and also covers the behaviour of a competitive firm.

**Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be **9** questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks (10 x 2= 20).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks (15x4=60).

**UNIT- I**

Budget constraint; properties of budget set, how budget line changes.

Preference; Indifference curves, Marginal rate of substitution.

Utility; perfect substitutes, perfect complements,

Choice; optimal choice; neutrals and bads, discrete goods, concave preferences.

Demand; income offer curves and Engel curves, price offer curve and demand curve. Revealed preference

**UNIT- II**

Slutsky equation; the substitution effect, the total change in demand, rates of change.

Buying and Selling; net gross demand, offer curves and demand curves Intertemporal choice.

**UNIT- III**

Uncertainty and risk aversion

Technology : Production Functions ; Homogenous and homothetic ; Cobb Douglas and CES : Properties ; elasticity of substitution ; Eulers theorem.

#### UNIT-IV

Perfect competition: Assumptions: theory of a firm under perfect competition demand and revenue; equilibrium of the firm in the short run and long run; long run industry supply curve: Increasing, decreasing and constant cost industries.

Price controls: Price Ceiling; price floors; production import quotas Welfare: allocative efficiency under perfect competition.

#### Readings:

1. Scope as in Varian, H.R (2010). *Intermediate Microeconomics, a Modern Approach* (8th ed.). W.W. Norton and Company/Affiliated East-West Press (India) given as follows;  
Unit 1 chapters 2 to 7  
Unit 2 chapters 8,9,10  
Unit 3 chapters 12 to 18  
Unit 4 chapters 19, 22, 23

#### Advanced Readings:

2. Varian.H.R (2010). *Intermediate Microeconomics, a Modern Approach* (8th ed.)W.W. Norton and Company/Affiliated East-West Press (India).The workbook by Varian and Bergstrom could be used for problems.
3. C. Snyder and W. Nicholson.(2010).*Fundamentals of Microeconomics*, Cengage Learning (India).

9. Mankiw, G. (2000). *Microeconomics*. In *Principles of Microeconomics* (Vol. 1, pp. 3–6, 270–272).

## **ECO-C6: INTERMEDIATE MACROECONOMICS - I**

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

**Course Objective:** This is the second module of a three-module sequence on Macroeconomics. This course introduces students to formal modelling of the macro economy in terms of analytical tools. It discusses various alternative theories of output and employment determination in a closed economy in the short run as well as medium run and the role of policy in this context. It also introduces students to various micro-founded theories of macro behaviour, e.g., consumption and investment behaviour of households and the demand and supply of money generated in the system.

### **Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be 9 questions in all.

The first question would be compulsory, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidates will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks (10 x 2= 20).

Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidate shall be required to attempt one question from each unit-4 in all. Each question shall carry 15 marks (15 x 4= 60).

### **Unit-I**

#### **Aggregate demand and aggregate supply curves**

Derivation of aggregate demand and aggregate supply curves; interaction of aggregate demand and supply to determine equilibrium output, price level and employment.

### **Unit-II**

#### **Inflation, unemployment and expectations**

Phillips curve; adaptive and rational expectations; policy ineffectiveness debate

### **Unit-III**

#### **Microeconomic Foundations**

**Consumption:** Keynesian consumption function; Fisher's theory of optimal intertemporal choice; lifecycle and permanent income hypotheses; rational expectations and random walk of consumption expenditure

**Investment:** Determinants of business fixed investment; residential investment and inventory investment

#### **Unit-IV**

**Demand for money:** Interest sensitivity of money demand functions; Baumol's inventory theoretic approach; Tobin portfolio choice model; Friedman's approach to money demand.

**Supply of money:** High powered money; Money Multiplier.

#### **Readings:**

#### **ECO-C7: STATISTICAL METHODS FOR ECONOMICS**

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

#### **Course Description**

This is a course on statistical methods for economics. It begins with some basic concepts and terminology that are fundamental to statistical analysis and inference. It then develops the notion of probability, followed by probability distributions of discrete and continuous random variables and of joint distributions. This is followed by a discussion on sampling techniques used to collect survey data. The course introduces the notion of sampling distributions that act as a bridge between probability theory and statistical inference. The semester concludes with some topics in statistical inference that include point and interval estimation.

#### **Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be **9** questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks (10 x 2= 20).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks (15x4=60).

## **UNIT-I**

### **Introduction and Overview**

The distinction between populations and samples and between population parameters and sample statistics; the use of measures of location and variation to describe and summarize data; population moments and their sample counterparts.

### **Elementary Probability Theory**

Sample spaces and events; probability axioms and properties; counting techniques; conditional probability and Bayes' rule; independence.

## **UNIT-II**

### **Random Variables and Probability Distributions**

Defining random variables; probability distributions; expected values of random variables and of functions of random variables; properties of commonly used discrete and continuous distributions (uniform, binomial, normal, poisson and exponential random variables).

## **UNIT-III**

### **Random Sampling and Jointly Distributed Random Variables**

Density and distribution functions for jointly distributed random variables (two variables case); computing expected values; covariance and correlation coefficients.

### **Sampling**

Principal steps in a sample survey; methods of sampling; the role of sampling theory; properties of random samples.

## **UNIT-IV**

### **Point and Interval Estimation**

Estimation of population parameters using methods of moments and maximum likelihood procedures; properties of estimators; confidence intervals for population parameters.

### **Readings:**

1. Jay L. Devore (2010). *Probability and Statistics for Engineers*. Cengage Learning.
2. John E. Freund. (1992). *Mathematical Statistics*. Prentice Hall.
3. Richard J. Larsen and Morris L. Marx. (2011). *An Introduction to Mathematical Statistics and its Applications*. Prentice Hall.
4. William G. Cochran. (2007). *Sampling Techniques*. John Wiley.

**SKILL ENHANCEMENT ELECTIVE**  
**ECO-SEE 1: DATA SOURCES-I**

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 2**  
**(2 Class Room Teaching)**

**Course Description**

This course is designed to expose the students to the data sources of Indian Economic pertaining to macro economic variables. The emphasis will be on thinking like an economist and the course will illustrate how get data on macroeconomic concepts to be applied to analyze real-life situations.

**Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be 9 questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks (10 x 2= 20).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks (15x4=60).

**UNIT-I**

National Income Accounts Data on key macroeconomic indicators: definitions, components, measurement and problems.

**UNIT- II**

Sources of data on Monetary Parameters: Components and Measurement of Money Supply, Banking statistics and their Limitations

**UNIT- III**

Sources of data on Fiscal Parameters: Details of Revenue and Expenditure of the central and state Governments, Deficit Indicators and Limitations.

**UNIT- IV**

Data Sources on Inflation: Consumer Price Index and Wholesale Price Index, its measurement and problems

**Readings :**

1. [RBI Database on Indian Economy](#)
2. [Latest National Account Statistics](#) India (CSO)
3. [India Statistics](#) (CSO – Cover Agriculture, Industry, Service and Social Sector)
4. [District Domestic Products \(All Major States – 1999-00 to 2008-09\)](#)
5. [Planning Commission Socio-economic Database on Indian Economy](#)
6. [Indian Planning Experience - A Statistical Profile](#)
7. [Economic Survey Database](#)
8. [Export-import Databank of India](#)

**Generic Elective for Economics Honours Students only**  
**GENERAL ELECTIVE (GE) COURSE-V**

**SOC-GE05: INDIAN SOCIETY : IMAGES AND REALITIES**

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

**Course Objective:**

This course seeks to provide an interdisciplinary introduction to Indian society.

**Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be **9** questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks (10 x 2= 20).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks (15x4=60).

**Outline:**

**1. Ideas of India: Civilization, Colony, Nation and Society (3 Weeks)**

**2. Institutions and Processes (9 Weeks)**

**2.1 Village, Town and Region**

**2.2 Caste, Religion and Ethnicity**

**2.3 Family and Gender**

**2.4 Political Economy**

**3. Critiques (2 Weeks)**

**COURSE CONTENTS AND ITINERARY**

**UNIT-I**

**1. Ideas of India: Civilization, Colony, Nation and Society (3 Weeks)**

1.1 Embree, Ainslie Thomas, *Imagining India*. Delhi: Oxford University Press, 1989. Chapter 1- Brahmanical Ideology and Regional Identities. Pp. 9 – 27

**(5 Class Room Teaching + 1 Tutorial)**

### Course Description

This is a course on statistical methods for economics. It begins with some basic concepts and terminology that are fundamental to statistical analysis and inference. It then develops the notion of probability, followed by probability distributions of discrete and continuous random variables and of joint distributions. This is followed by a discussion on sampling techniques used to collect survey data. The course introduces the notion of sampling distributions that act as a bridge between probability theory and statistical inference. The semester concludes with some topics in statistical inference that include point and interval estimation.

**Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be **9** questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks ( $10 \times 2 = 20$ ).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks ( $15 \times 4 = 60$ )

**UNIT- I**

Estimation of population means.

The basic idea of significance test, Null and alternative hypotheses. Type I & Type II errors, level of significance, concept of p-value. Tests of hypotheses and confidence intervals for the parameters of a normal distribution (one and two sample problems), Paired t-test.

**UNIT- II**

Categorical data: Tests of proportions, tests of association and goodness-of-fit using Chi-square test, Yates' correction.

**UNIT- III**

Test of significance for correlation coefficient. Fisher's  $z$  -transformation for testing the hypothetical value of correlation coefficient.

Basic Idea of Non-parametric tests, sign test for median, Paired sign test, Wilcoxon signed rank test for symmetry, Wilcoxon two-sample test.

**UNIT- IV**

Analysis of variance, one-way and two-way classifications. Brief exposure of three basic principles of design of experiments, treatment, plot and block. Analysis of completely randomized design, randomized complete block design.

**SUGGESTED READING:**

4. Dunn, O.J. Basic Statistics: A primer for the Biomedical Sciences (1964, 1977), John Wiley.
5. Bancroft, Holden: Introduction to Bio-statistics (1962), P.B. Hoebar, New York
6. Goldstein, A Biostatistics- An introductory text (1971), The Macmillan, New York.

## MAT-C1: CALCULUS

### THEORY

[Max. Marks: 100]  
(Final-80+Internal Assessment-20)  
Time: 3hrs.  
Credits: 4

#### **Note :**

1. **The question paper will have nine questions. Question No.1 spread over the whole syllabus will be compulsory. Candidates will attempt five questions.**
2. **There will be two questions from each unit and the students will be required to answer one question from each unit.**
3. **All questions carry equal marks.**

**Objective:** The main goal of this course is to deliver the basics of differential and integral calculus, for real as well as multivariate functions. It is expected that the students develop a taste of writing proofs, particularly for Unit I, rather than applying formulas only.

#### **Unit I**

##### **Differential Calculus**

Precise definition of limit, continuity, one-sided limit, limits involving infinity, asymptotes of graphs, tangents and the derivative at a point, the derivative of a function, extreme values of functions, mean value theorem, monotone functions and the first derivative test, test for concavity, tracing of curves.

(Scope: Sections 2.3 – 2.6, 3.1, 3.2, 4.1 – 4.4 of [1]).

#### **Unit II**

##### **Integral Calculus**

Riemann sums, definite integrals, area between curves, volumes using cross sections and cylindrical shells, arc length and areas of surfaces of revolution.

(Scope: Sections 5.1, 5.6, 6.1 – 6.4 of [1]).

#### **Unit III**

##### **Multivariable Functions**

Limits and continuity for functions of several variables, partial derivatives, the chain rule, directional derivatives, gradient vectors, tangent planes, extreme values and saddle points, Lagrange multipliers.

(Scope: Sections 14.2 – 14.8 of [1]).

#### **Unit IV**

##### **Multiple Integrals**

Double integrals, triple integrals, Jacobian, substitutions in multiple integrals, Green's theorem, Stoke's theorem and the divergence's theorem.

(Scope: Relevant sections of Chapters 15, 16 of [1]).

#### **List of Practicals (using any software)**

- (i) Matrix operations (addition, multiplication, inverse, transpose, determinant and rank).
- (ii) Plotting of graphs of polynomials of degree 4 and 5, the derivative graph, the second derivative graph and comparing them.
- (iii) Plotting functions  $e^{ax+b}$ ,  $\log(ax+b)$ ,  $1/(ax+b)$ ,  $\sin(ax+b)$ ,  $\cos(ax+b)$ ,  $|ax+b|$  and to illustrate the effect of a and b on the graph.

- (iv) Obtaining surfaces of revolution of curves.
- (v) Tracing of conics in Cartesian coordinates/ polar coordinates.
- (vi) 3D plots.
- (vii) Computation of limits, derivatives and integration of vector functions.
- (viii) Tangent planes to surfaces at a given point.
- (ix) Sketching ellipsoid, hyperboloid of one and two sheets, elliptic cone, elliptic, paraboloid, hyperbolic paraboloid using Cartesian coordinates.

### MAT-C1: Calculus PRACTICAL (Using any software)

[Max. Marks: 50](Final-40+Internal Assessment-10)

Time : 3hrs.

Credits: 2

### List of Practicals (using any software)

- (i) Plotting of graphs of function  $eax + b$ ,  $\log(ax + b)$ ,  $1/(ax + b)$ ,  $\sin(ax + b)$ ,  $\cos(ax + b)$ ,  $|ax + b|$  and to illustrate the effect of  $a$  and  $b$  on the graph.
- (ii) Plotting the graphs of polynomial of degree 4 and 5, the derivative graph, the second derivative graph and comparing them.
- (iii) Sketching parametric curves (Eg. Trochoid, cycloid, epicycloids, hypocycloid).
- (iv) Obtaining surface of revolution of curves.
- (v) Tracing of conics in Cartesian coordinates/ polar coordinates.
- (vi) Sketching ellipsoid, hyperboloid of one and two sheets, elliptic cone, elliptic, paraboloid, hyperbolic paraboloid using cartesian coordinates.
- (vii) Matrix operation (addition, multiplication, inverse, transpose).

## **GENERIC ELECTIVE IN ECONOMICS FOR NON ECONOMICS STUDENTS**

### **ECO- GE5 : INDIAN ECONOMY-I**

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

#### **Course Description**

Using appropriate analytical frameworks, this course reviews major trends in economic indicators and policy debates in India in the post-Independence period, with particular emphasis on paradigm shifts and turning points.

#### **Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be 9 questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks (10 x 2= 20).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks (15x4=60).

#### **Course Outline**

##### **UNIT-I**

***Economic Development since Independence:*** State of the Indian economy at the Independence. Changes in the structure of the Indian economy. Adoption of Planning in India. Objectives, Strategy and Appraisal of Planning in India.

##### **UNIT –II**

***Economic Reforms in India:*** State of the Indian Economy in 1991. Features of Economic Reforms and Structural Adjustment Programme: Liberalization, Privatization and Globalization. Appraisal of Economic Reform Programme.

##### **UNIT-III**

***Agriculture and its Development in India:*** Features of Indian Agriculture. New Agricultural Strategy in India (Green Revolution). Economic Liberalization and Indian Agriculture.

##### **UNIT-IV**

***Industry and Public sector in India:*** Phases of Industrial Growth in India, Appraisal of the Industrial Policy resolution of 1956, 1980 and 1991. Performance of Public sector Undertakings in India and its Evaluation. Privatization – Nature and Extent in India.

**Essential Readings:**

1. Ahluwalia, I. J., & Little, I. M. D. (Eds.). (1998). *India's economic reforms and development: Essays for Manmohan Singh*. New Delhi, India: Oxford University Press.
2. Brahmananda, P. R., & Panchmukhi, V. R. (Eds.). (1987). *The development process of Indian economy*. Bombay, India: Himalaya Publishing House.
3. Jalan, B. (1992). *The Indian economics – problems and prospects*. New Delhi, India: Viking.
4. Lucas, E. B., & Papanek, G. F. (Eds.). (1988). *The Indian economy – recent development and future prospects*. Oxford, England: Oxford University Press
5. Nayak, P. (Ed.). (2015). *Economic development of India*. New York, NY: Routledge.
6. Dhar P.K. (2016). *Indian Economy- Its growing dimensions*. New Delhi: Kalyani Publishers.

**Further Readings:**

2. *Economic and political weekly*. (Various issues). Mumbai, India: Sameeksha Trust.

## **B.A. (Hons.) Semester IV (under CBCS)**

### **ECO- C8: INTERMEDIATE MICROECONOMICS – II**

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

#### **Course Description**

This course is a sequel to Intermediate Microeconomics I. The emphasis will be on giving conceptual clarity to the student coupled with the use of mathematical tools and reasoning. It covers general equilibrium and welfare, imperfect markets and topics under information economics.

#### **Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

#### **The paper-setter must put a note in the question paper in this regard.**

- There shall be 9 questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks (10 x 2= 20).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks (15x4=60).

#### **UNIT- I**

##### **Imperfect Competition**

Monopoly; pricing; measurement of market power; Multiplant monopoly

Price discrimination; Inter temporal; peak-load pricing; two-part tariff

Regulation of Monopoly

Monopolistic competition: price and output determination

Economic efficiency and resource allocation

#### **UNIT-II**

##### **Imperfect Competition**

Oligopoly; Price leadership; Cournot , Stackleberg and Bertrand Models

Game theory and competitive strategies: Dominant Strategy; Mixed strategies; Prisoners Dilemma ; Repeated and Sequential games

#### **UNIT- III**

##### **General Equilibrium, Efficiency and Welfare**

Equilibrium and efficiency under pure exchange and production; overall efficiency

Welfare economics; Social welfare, welfare maximisation, envy and equity,

## UNIT- IV

### Market Failure

Externalities; Production and Consumption, Coase Theorem, Market Signals, Public Goods: Provision of Public Goods, Free Riding, Different Levels of Public Goods. Asymmetric Information: Market for Lemons, Moral Hazard, Adverse Selection, Signaling.

### Readings:

1. Scope as in Varian. H.R (2010). *Intermediate Microeconomics, a Modern Approach* (8th ed.)W.W. Norton and Company/Affiliated East-West Press (India) given as follows:

Unit 1 chapters 24, 25

Unit 2 chapters 27, 28

Unit 3 chapters 31, 32, 33

Unit 4 chapters 34, 36, 37

### Advanced Readings:

1. Varian.H.R (2010). *Intermediate Microeconomics, a Modern Approach* (8th ed.)W.W. Norton and Company/Affiliated East-West Press (India).The workbook by Varian and Bergstrom could be used for problems.
2. C. Snyder and W. Nicholson.(2010).*Fundamentals of Microeconomics*,Cengage Learning (India).
3. Maddala, G.S. and Miller, R. L. (2006). *Intermediate microeconomics: theory, issues, applications*. McGraw-Hill Companies.
4. Koutsoyiannis, A. (2003). *Modern microeconomics*.(2<sup>nd</sup> ed.). Paperback
5. B. Douglas Bernheim and Michael D. Whinston. (2009). *Microeconomics* Tata McGraw-Hill (India).
6. Bergstrom, T. C., & Varian, H. R. (1990). *Workouts in intermediate microeconomics*. WW Norton.
7. Pindyck, Robert S., and Daniel L. Rubinfeld. *Microeconomics*. Upper Saddle River, N.J.: Pearson/Prentice Hall, 2009.
8. Mankiw, G. (2000). *Microeconomics*. In *Principles of Microeconomics* (Vol. 1, pp. 3–6, 270–272).

## **ECO-C9: INTERMEDIATE MACROECONOMICS – II**

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

**Course Objective:** This course is a sequel to Intermediate Macroeconomics I. In this course students are introduced to long run issues like growth, technical progress, economics of ideas, innovation and knowledge creation. This course provides insights into modern business cycle analysis. Finally it introduces students to open economy macro issues. At the end, it provides a long run perspective to policy-making by framing policies in a dynamic context.

### **Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be 9 questions in all.

The first question would be compulsory, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidates will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks (10 x 2= 20).

Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidate shall be required to attempt one question from each unit-4 in all. Each question shall carry 15 marks (15 x 4= 60).

### **Unit-I**

#### **Economic growth**

Harrod-Domar model; Solow model; Golden rule, technological progress, economics of ideas, engines of growth, modern theories of endogenous growth

### **Unit-II**

#### **Business cycles**

Real business cycle theory; New Keynesian models of sticky prices

### **Unit-III**

#### **Open economy models**

Short-run open economy models; Mundell-Fleming model; exchange rate determination; purchasing power parity; asset market approach; Dornbusch's overshooting model; monetary approach to balance of payments; international financial markets

## Unit-IV

### Fiscal and monetary policy

Active or passive; monetary policy objectives and targets; rules versus discretion: time consistency; the government budget constraint; government debt and Ricardian equivalence

### Readings

### ECO -C10: INTRODUCTORY ECONOMETRICS

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

### Course Description

**Objective:** Application of economic theory need a reasonable understanding of economic relationship and relevant statistical methods. The econometric theory thus becomes a very powerful tool for understanding of applied economic relationships and for meaningful research in economics. This paper accordingly is devoted to equip the students with basic theory of econometrics and relevant applications of the methods. The topics covered in the course include various problems faced in estimation of both single equations and simultaneous equations models.

Besides the time-tested method of imparting verbal instructions through lectures, description and derivation of econometric models would be demonstrated by extensive use of blackboard. Examples, in so far as possible, would be selected from everyday life/experience. The feedback would be sought through the students writing assignments and written examinations.

### Instructions for Paper-setter and candidates:

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours. The paper-setter must put a note in the question paper in this regard.
- There shall be **9** questions in all. The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks (10 x 2= 20).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks (15x4=60).

### **UNIT- I**

Introduction: - Nature and Scope of Econometrics, Methodology of Econometrics. Specification of an econometric model. Nature of Data used in estimation.

Simple and Multiple Regression Models: - Estimation of model by method of Ordinary Least Squares; Properties of the Least Squares estimators, the Gauss-Markov theorem. Goodness of fit-R Square & Adjusted R Square.

### **UNIT -II**

Testing Significance of Regression Coefficients: Confidence Interval and Hypotheses Testing.

Econometrics Problems: - Nature, Consequences, Detection and Remedial measures of the problems of Multicollinearity, Heteroscedasticity and Autocorrelation.

### **UNIT- III**

Specification Errors: Tests of Specification and misspecification: Omission of a relevant variable; Inclusion of irrelevant variable; Errors of measurement in dependent and independent variables.

Model Selection Criteria. Uses of Dummy Variables as independent variables.

### **UNIT- IV**

Dynamic Econometric Models: - Lags in econometrics; Autoregressive and Distributed Lag Models. Koyck's methods of estimation; Adaptive Expectation and Partial Adjustment approaches for rationalization of Koyck's model.

Simultaneous Equation Models: - Description, Identification Problem. Statement and Numerical examples of Rank and Order conditions.

### **Readings**

1. John E. Freund (1992). *Mathematical Statistics*. Prentice Hall.
2. Richard J. Larsen and Morris L. Marx (2011). *An Introduction to Mathematical Statistics and its Applications*. Prentice Hall.
3. D. N. Gujarati and D.C. Porter (2009). *Essentials of Econometrics* (4<sup>th</sup> ed.) McGraw Hill, International Edition.

5. Jan Kmenta, (2008). *Elements of Econometrics*. (2<sup>nd</sup> ed.). Indian Reprint, Khosla Publishing House.

## **SKILL ENHANCEMENT ELECTIVE**

### **ECO-SEE 2: DATA SOURCES-II**

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 2**

**(2 Class Room Teaching)**

#### **Course Description**

This course is designed to expose the students to the data sources of Indian Economic pertaining to macro economic variables. The emphasis will be on thinking like an economist and the course will illustrate how get data on macroeconomic concepts to be applied to analyze real-life situations.

#### **Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

#### **The paper-setter must put a note in the question paper in this regard.**

- There shall be 9 questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks (10 x 2= 20).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks (15x4=60).

#### **UNIT- I**

Data sources on Agriculture, Subsidies and Commodities Prices; Coverage and limitations.

#### **UNIT- II**

Balance of Payments: Import and Export data on Indian Economy, composition and data Limitations. WITS Database and its Components.

#### **UNIT-III**

Introduction to Industrial Databases: ASI and PROWESS. ; Coverage, important categories and limitations.

#### **UNIT-IV**

NSSO Data: Introduction to various rounds; Coverage, important categories and limitations.

#### **Readings :**

1. **RBI Database on Indian Economy**
2. **Latest National Account Statistics India (CSO)**
3. **India Statistics (CSO – Cover Agriculture, Industry, Service and Social Sector)**
4. **District Domestic Products (All Major States – 1999-00 to 2008-09)**
5. **Planning Commission Socio-economic Database on Indian Economy**
1. **Indian Planning Experience - A Statistical Profile**
7. **Economic Survey Database**
8. **Export-import Databank of India**

**Generic Elective for Economics Honours Students only**

**GENERAL ELECTIVE (GE) COURSE-VI**

**SOC-GE06: RETHINKING DEVELOPMENT**

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

**Objective:** This paper examines the ideas of development from a sociological perspective. It introduces students to different approaches to understanding development and traces the trajectory of Indian experience with development from an interdisciplinary perspective.

**Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be 9 questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks (10 x 2= 20).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks (15x4=60).

**Outline:**

- 1. Unpacking Development**
- 2. Theorizing Development**
- 3. Developmental Regimes in India**
- 4. Issues in Developmental Praxis**

*Course Contents and Itinerary*

**UNIT-I**

**1. Unpacking Development (4 Weeks)**

- 1.1 Bernstein, Henry. *Underdevelopment and Development*. Harmondsworth: Penguin, 1973. Introduction: Development and the Social Sciences. Pp. 13 – 28.
- 1.2 Wolfgang, Sachs (ed.) *The Development Dictionary: A Guide to Knowledge and Power*. London: Zed Books. 1992. pp. 1-21.
- 1.3 Rist, Gilbert. *The History of Development*. London: Zed, 2008. Pp. 8 – 46
- 1.4 Ferguson, J. 2005. 'Anthropology and its Evil Twin; 'Development' in the Constitution of a Discipline', in M. Edelman and A. Haugerud (eds.) *The Anthropology of Development and Globalization*. Blackwell Publishing. pp140-151.

## UNIT-II

### 2. Theorizing Development (5 Weeks)

- 2.1 Harrison, David. *The Sociology Of Modernization And Development*. London: Routledge, 1991. Chapters 1 & 2. Pp. 1 – 54
- 2.2 Frank, Andre Gunder. 1966. 'The Development of Underdevelopment', *Monthly Review*. 18 (4) September 17-31
- 2.3 Redclift, Michael. 1984. *Development and the Environmental Crisis. Red or Green alternatives* ?New York: Methuen & Co. Chapter 1 and 7, pp 5-19,122-130.
- 2.4 Visvanathan, Nalini, Lynn Duggan, Laura Nisonoff & Nan Wiegersma (eds). 1997. *The Women, Gender and Development Reader*. Delhi: Zubaan, pp33-54.
- 2.5 Sanyal, Kalyan. 2007. *Rethinking Capitalist Development: Primitive Accumulation, Governmentality and Post-Colonial Capitalism*. New Delhi: Routledge, pp 168-189.
- 2.6 Sen, A. 1999. *Development as Freedom*. New Delhi : Oxford University Press, pp. 3-11.

## UNIT-III

### 3. Developmental Regimes in India (3 Weeks)

- 3.1 Bardhan, Pranab. *The Political Economy of Development In India*. Delhi: Oxford, 1992. Pp. 1-60.
- 3.2 Chatterjee, Partha. Democracy and Economic Transformation in India, *Economic and Political Weekly*, Vol. 43, No. 16 (Apr. 19 - 25, 2008), pp. 53-62.

## UNIT-IV

### 4. Issues in Developmental Praxis (2 Weeks)

- 4.1 Scudder. T. 1996. 'Induced Impoverishment, Resistance and River Basin Development' in Christopher McDowell (ed.) *Understanding Impoverishment: The Consequences of Development Induced Displacement*. Oxford: Berghahn books. Pp. 49-78.
- 4.2 Sharma, Aradhana. *Logics of Empowerment: Development, Gender and Governance in Neoliberal India*. Minneapolis: University of Minnesota Press, 2008. Chapters. Introduction, Chapter 4 and Conclusion.

## **STAT-GE-4: APPLIED STATISTICS**

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

### **Course Description**

This is a course on statistical methods for economics. It begins with some basic concepts and terminology that are fundamental to statistical analysis and inference. It then develops the notion of probability, followed by probability distributions of discrete and continuous random variables and of joint distributions. This is followed by a discussion on sampling techniques used to collect survey data. The course introduces the notion of sampling distributions that act as a bridge between probability theory and statistical inference. The semester concludes with some topics in statistical inference that include point and interval estimation.

### **Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be 9 questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks ( $10 \times 2 = 20$ ).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks ( $15 \times 4 = 60$ ).

### **UNIT- I**

Economic Time Series: Components of time series, Additive and multiplicative models with their merits and demerits, Illustrations of time series. Measurement of trend: free-hand curve method and method of moving averages, curve fitting using least squares (linear, quadratic and modified exponential), Measurement of seasonal variations by method of ratio to trend and moving averages.

### **UNIT- II**

Index numbers, definition, Methods to construct price, quantity and value index numbers. Problems involved in the construction of index numbers, use of averages, simple aggregative and weighted average methods. Laspeyre's, Paasche's, Edgeworth - Marshall and Fisher's index numbers. Time and factor reversal tests of index numbers. Chain Base index numbers, Cost of living index number, interpretation and applications of index numbers.

### **UNIT- III**

Statistical Quality Control: Importance of statistical methods in industrial research and practice.

Causes of variations in quality: chances and assignable. General theory of control

charts, process & product control. Control charts for variables: X-bar and R-charts. Control charts for attributes: p and c charts for equal and unequal samples.

#### **UNIT- IV**

Demographic Methods: Measurement of population rates of vital events.

Measurement of mortality: CDR, SDR (w.r.t. Age and sex), IMR

Measurement of fertility and reproduction: CBR, GFR and TFR.

Measurement of population growth: GRR, NRR,

Life (mortality) tables: definition of its main functions and uses.

3. Gupta, S.C. and Kapoor, V.K. (2008): Fundamentals of Applied Statistics, 4th Edition (Reprint), Sultan Chand & Sons.
4. Montgomery, D.C. (2009): Introduction to Statistical Quality Control, 6th Edition, Wiley India Pvt. Ltd.

## **MAT-C3: Real Analysis**

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

*Note:*

- 1. The question paper will have nine questions. Question No.1 spread over the whole syllabus will be compulsory. Candidates will attempt five questions.**
- 2. There will be two questions from each unit and the students will be required to answer one question from each unit.**
- 3. All questions carry equal marks.**

**Objective:** Introduction to the cardinality of sets, completeness property of real numbers, sequences and series of real numbers and the limit and continuity of real functions.

### **Unit I**

Finite and infinite sets, countable and uncountable sets, Cantor's theorem, Schroder-Bernstein theorem, the Cantor set, the completeness property of reals, applications of the supremum property, the Archimedean property, density of rational numbers in reals, intervals, decimal and general expansions of reals.

(Scope: Sections 1.3, 2.3, 2.4, 2.5 of [1] and pages 24-29 of [2].)

### **Unit II**

Sequence and their limits, limits theorems, monotone sequences, subsequences and the Bolzano-Weierstrass theorem, monotone subsequence theorem, the Cauchy criterion, the Cantor nested interval theorem, divergence of a sequence.

(Scope: Sections 3.1 to 3.6 of [1].)

### **Unit III**

Limit of a function (epsilon-delta approach) and limit theorems, continuous functions, combinations of continuous functions, extensions of the limit concept, continuous functions on intervals, monotone functions and inverse functions.

(Scope: Sections 4.1, 4.2, 4.3, 5.1, 5.2, 5.3, 5.6 of [1].)

### **Unit IV**

Introduction to infinite series, absolute convergence of infinite series, tests for absolute convergence, tests for non-absolute convergence of a series.

(Scope: Sections 3.7, 9.1, 9.2, 9.3 of [1].)

### **GENERIC ELECTIVE IN ECONOMICS FOR NON- ECONOMICS STUDENTS**

#### **ECO-GE6: INDIAN ECONOMY-II**

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

#### **Course Description**

This course examines sector-specific policies and their impact in shaping trends in key economic indicators in India. It highlights major policy debates and evaluates the Indian empirical evidence. Given the rapid changes taking place in the country, the reading list will have to be updated annually.

#### **Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be 9 questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks (10 x 2= 20).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks (15x4=60).

#### **UNIT-I**

**Service Sector in India:** Service Sector Growth-Pattern and Future Prospects. Sustainability of Services Led Growth in India. Need for Infrastructure and Government strategy on Infrastructure Development in India.

#### **UNIT-II**

**Public Finance:** Indian Tax Structure, Fiscal Reforms in Indian Economy, Fiscal Responsibility and Budget Management in India.

#### **UNIT-III**

**Financial Sector and its Development in India:** Structure of the Financial System in India. Nationalization of Banks – Causes and Evaluation of Performance. Banking Sector Reforms since 1991. Capital Market – Growth, Problems and Reforms since 1991. Role of Securities Exchange Board of India (SEBI).

#### **UNIT-IV**

**External Sector:** Trade Policy during Pre and Post Reform Period. Foreign Capital in India-its Need and Flow, FDI and MNCs in India.

#### **Readings:**

**Syllabi of B.A. (Hons.) Semester V (under CBCS)**  
**ECO-C11: INDIAN ECONOMY –I**

**Max. Marks: 80**

**Time: 3 Hrs.**  
**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

**Objective:** The objective of this paper is to acquaint the students with the strategy of economic development of the Indian Economy since Independence. The paper also aims at creating an awareness among the students regarding the contemporary issues pertaining to various sectors of the economy.

**Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be **9** questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks (10 x 2= 20).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks (15x4=60).

**UNIT – I**

**Economic Policy:** Economic Policy–Definition. Types - Qualitative and Quantitative. Need for Economic Policy - Economic Institutions and Policies in India (only introduction). Problems in Policy making in India.

**UNIT – II**

**Economic Development Strategy in India:** Adoption of Planning in India: Objectives, Strategy and Assessment (Plan wise details to be excluded). Need for Economic Reforms - State of the Economy in 1991.NitiAyog- its Objectives and Functions.

**UNIT-III**

**Demography and Economic Development:** Theory of Demographic Transition. Demographic Features of India's Population. Population Growth in India - Promoting or Retarding Economic Growth. Urbanisation in India- Extent, Causes and Consequences of Rapid Urbanisation.

**UNIT-IV**

**Structural Changes in India:** Changes in Sector Income Distribution and Occupational Structure. Inter-State Disparities in the Pattern of Development - Causes, Indicators and Policy Measures to Remove Regional Imbalances.

## **ECO-C12: DEVELOPMENT ECONOMICS-I**

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

### **Course Description**

This is the first part of a two-part course on economic development. The course begins with a discussion of alternative conceptions of development and their justification. It then proceeds to aggregate models of growth and cross-national comparisons of the growth experience that can help evaluate these models. The axiomatic basis for inequality measurement is used to develop measures of inequality and connections between growth and inequality are explored. The course ends by linking political institutions to growth and inequality by discussing the role of the state in economic development and the informational and incentive problems that affect state governance.

### **Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be **9** questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks (10 x 2= 20).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks (15x4=60).

#### **UNIT-I**

##### **1. Conceptions of Development and Growth**

Development in historical perspective: Origin of development in economic thought. Alternative measures of development (Per capital income, GDP, PQLI and HDI), Documenting the international variation in these measures, Comparing development trajectories across nations and within them.

#### **UNIT-II**

##### **2. Development and Underdevelopment**

Imperialism and colonialism, new imperialism, neo-colonialism and dependency: its forms and effects

Harrod-Domer Model; Solow model of steady state growth; Endogenous growth theories: Romer and Lucas.

#### **UNIT-III**

##### **3. Poverty and Inequality: Definitions, Measures and Mechanisms**

Inequality axioms; a comparison of commonly used inequality measures; connections between inequality and development: Kuznets' Inverted U – shaped Curve and Augmented Kuznets' Curve; poverty measurement; characteristics of the poor; mechanisms that generate poverty traps and path dependence of growth processes.

#### **UNIT-IV**

##### **4. Political Institutions and the Functioning of the State**

The determinants of democracy; Alternative institutional trajectories and their relationship with economic performance; Within country differences in the functioning of the state institutions; State ownership and regulation; government failure and corruption.

State and planning, planning by direction, planning by market, planning in backward areas.

## **ECO-DSE1: ECONOMICS OF PUBLIC FINANCE**

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

### **Course Description**

Public economics is the study of government policy from the points of view of economic efficiency and equity. The paper deals with the nature of government intervention and its implications for allocation, distribution and stabilization. Inherently, this study involves a formal analysis of government taxation and expenditures. The subject encompasses a host of topics including public goods, market failures and externalities. The paper is divided into two sections, one dealing with the theory of public economics and the other with the Indian public finances.

### **Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be **9** questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks (10 x 2= 20).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks (15x4=60).

### **UNIT – I**

Theory of Maximum Social Advantage. Private Goods, Public Goods, mixed goods and Merit Goods. Optimal Provision of Public Goods: partial equilibrium approach; free riding problem. Externalities: Pigouvian and Coarse solutions. Overview of Different Role of Government: Allocation, Stabilization and Distribution.

### **UNIT – II**

Regressive, Progressive and Proportional Taxes. Direct and Indirect Taxes. Incidence of Indirect Taxes. Effects of Taxation: concepts of Deadweight losses and Excess Burden.

### **UNIT – III**

Types of Government Budgets. Different Concepts of Budgetary Deficits in the Indian Context. Economic and Functional Classification of Central Govt. Budgets.

### **UNIT- IV**

Changing Trends and Pattern of Direct and Indirect Taxes in India. Changing Trends and Pattern of Government Expenditure in India. Recent Tax and Expenditure Reforms in India. Issues Need and objectives of fiscal federalism in India.

**ECO-DSE2: INTERNATIONAL ECONOMICS****Max. Marks: 80****Time: 3 Hrs.****Credits: 6****(5 Class Room Teaching + 1 Tutorial)****Course Description**

This course develops a systematic exposition of models that try to explain the composition, direction, and consequences of international trade, and the determinants and effects of trade policy. It then builds on the models of open economy macroeconomics, focusing on national policies as well as international monetary systems. It concludes with an analytical account of the causes and consequences of the rapid expansion of international financial flows in recent years. Although the course is based on abstract theoretical models, students will also be exposed to real-world examples and case studies.

**Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be 9 questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks (10 x 2= 20).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks (15x4=60)

### **UNIT- I**

What is international economics about? Theories of Absolute Advantage, Comparative Advantage and Opportunity Costs.

Heckscher-Ohlin Theory of Trade – Its main Features, Assumptions and Limitations.

New Approaches to Trade Theory: The Product Cycle Theory, Technology Gap Theory, Intra-industry trade.

### **UNIT- II**

Concept and types of Terms of trade.

Effects of Tariff under Partial Equilibrium Analysis. Non tariff Barriers. Political economy of Non-tariff Barriers.

Economic Integration: Concept and Forms of Regional Integration; Static and Dynamic Effects of Custom Union.

### **UNIT-III**

Foreign Exchange Market: Fixed versus flexible exchange rates, Concept, Role and Types of Foreign Exchange Transactions: Speculation, Arbitrage and Hedging

The Process of Adjustment in the Balance of Payments under Fixed and Flexible Exchange Rate Systems.

### **UNIT-IV**

International monetary systems: International Monetary Fund; Eurocurrency Market.

Financial Globalization and Financial crises : Causes and case studies.

## **ECO-C14: DEVELOPMENT ECONOMICS-II**

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

### **Course Description**

This is the second module of the economic development sequence. It begins with basic demographic concepts and their evolution during the process of development. The structure of markets and contracts is linked to the particular problems of enforcement experienced in poor countries. The governance of communities and organizations is studied and this is then linked to questions of sustainable growth. The course ends with reflections on the role of globalization and increased international dependence on the process of development.

### **Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be **9** questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks (10 x 2= 20).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks (15x4=60).

## **UNIT- I**

### **Demography and Development**

Demographic concepts; Demographic transitions during the process of development: Theory of Demographic Transition. Gender bias in preferences and outcomes and evidence on unequal treatment within households; migration.

## **UNIT- II**

### **Land, Labour and Credit Markets**

The distribution of land ownership; land reform and its effects on productivity; contractual relationships between tenants and landlords; land acquisition; nutrition and labor productivity; informational problems and credit contracts; microfinance; interlinkages between rural factor markets.

## **UNIT- III**

### **Environment and Sustainable Development**

Defining sustainability for renewable resources; a brief history of environmental change; common-pool resources; environmental externalities and state regulation of the environment; economic activity and climate change.

## **UNIT- IV**

### **Globalization**

Globalization in historical perspective; The economics and politics of multilateral agreements; trade, Production patterns and world inequality; Financial instability in a globalized world

### **Readings**

## ECO-DSE3: HISTORY OF ECONOMIC THOUGHT

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorials)**

### **Objective:**

Evolution of economic ideas is both a response to contemporary economic problems and a self-conscious attempt to refine earlier ideas to integrate them as a part of current social thought. The objective of this course is to familiarize the students with the historical evolution of economic ideas into the contemporary economics. The students would be evaluated at the end of each semester through subjective type questions/answers (both short and essay type). The scripts would be evaluated by the examiners having adequate teaching experience in the paper/options concerned.

### **Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be **9** questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks (10 x 2= 20).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks (15x4=60).

### **UNIT – I**

**Introduction:** The Economic Revolution, Scope and Significance of the Study of History of Economic Thought.

**Methodology of Economics:** Economics as a Scientific Discipline; Techniques of Economic Analysis; Sociology of Economics; Relativist and Absolutism; Deductive and Inductive Methods.

### **UNIT – II**

**Mercantilism:** Factors Responsible for the Rise of Mercantilism; Views on Trade, Money, Finance and Nation State.

**Physiocracy:** Rise of Physiocracy; The concept of Natural Order; Net Product and Circulation of Wealth.

### **UNIT-III**

**Adam Smith:** Theories of Value, Distribution and Growth.

**Ricardian Economics:** Value Analysis; Theories of Trade and Distribution; Views on Machinery and Employment.

**Malthus:** Theory of Glut and Glut Controversy.

## UNIT – IV

**Marxian Economics:** Dialectical Materialism and Laws of Dialectics; Mode of Production and its Fundamentals; Historical Materialism and Pre Capitalistic Economic Formations (Primitive Communism, Slavery and Feudalism); Labour Theory of Value; Development and Decay of Capitalism (commodity production, Accumulation, Surplus value and Organic Composition of Capital).

## ECO-DSE4: ECONOMICS OF INDUSTRY

**Max. Marks: 80**

**Time: 3 Hrs.**

**Credits: 6**

**(5 Class Room Teaching + 1 Tutorial)**

**Objective:** In the Contemporary world with globalization and liberalization more and more attention is being given to industry. Since industry performance critically depends on firms' behavior allowing equilibrium outcome, the course intends to provide a rigorous knowledge of different long-run equilibrium outcome of firms under different conditions from the point of view of public policy. The students are also equipped to deal with debates involved in the industrial development in a cogent and analytical manner, particularly in the Indian context.

However, it should be noted that Game Theoretic approach to any topic/problem is outside the scope of the present syllabus.

The time-tested method of imparting verbal instructions through lectures would be used. Examples, in so far as possible, would be selected from everyday life/experience. The feedback would be sought through the students writing assignments, tutorials and seminars.

The students would be evaluated at the end of each semester through subjective type questions/answers (both short and essay type).

**Instructions for Paper-setter and candidates:**

- The maximum marks for the paper will be 100. The question paper will be of 80 marks and continuous evaluation 20 marks. Time allowed will be 3 hours.

**The paper-setter must put a note in the question paper in this regard.**

- There shall be **9** questions in all.

The first question **compulsory** comprising 15 short answer type questions spread over the whole syllabus. The candidates are required to attempt 10 questions. Each question shall be of **two** marks ( $10 \times 2 = 20$ ).

Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 15 marks ( $15 \times 4 = 60$ ).
